

INTRODUCING

BioGraph[®]

INFINITI

360

A PANORAMIC VIEW OF YOUR CLIENT'S PSYCHOPHYSIOLOGY

THE NEW **360 SUITE** THINKS LIKE YOU

Five key body systems are covered with the 360's assessment and self-regulation tools. All you need to do is what you're already good at: discuss your client's symptoms and goals. Based on their situation, select the appropriate system and we take care of the rest with tailored evaluation and training.

ADDRESSING THE **MIND** AND **BODY** THROUGH KEY **BODY SYSTEMS**:

ALL THE **POWER** IN ONE **SOLUTION**

A SUITE THAT GUIDES YOU

BioGraph Infiniti 360 includes the most clinically oriented suite we've ever offered. The suite's tools are categorized and customized by body system: Respiratory, Cardiovascular, Central nervous system (CNS), autonomic nervous system (ANS), and Muscular. Based on the client's condition, you select the affected system and the 360 points you in the right direction for your intervention.

FEATURES

- Based on published research compiled by AAPB.
- Examine breathing, heart rate variability, arousal, skin temperature, muscle tension, EEG, and/or passive infrared HEG.
- Engage your client with movies or online video content.
- Available as starter, intermediate, or expert systems.
